ABOUT US

From Indonesian waters to the world's tables

DERFISH is a seafood supplier headquartered at Muara Angke, Jakarta's fishing port — where the catch comes ashore before sunrise.

We work directly with handline, pole-and-line and coastal net fishers across the Java Sea, the Banda Sea and the Indian Ocean. Every fish is graded on the dock, processed the same day, and frozen to lock in the quality it left the water with.

Our name carries our promise: the fish stands in the middle of everything we do. Sustaining the sea is not a slogan — it is the only way this business lasts.

RECEIVING & GRADING • DERFISH PLANT, MUARA ANGKE

“Headquartered inside the Muara Angke fishing port — the catch travels metres, not miles, before it is graded, processed and frozen.”

Three families, one water column

ZONE 01 • OPEN WATER • 0-200 M

Pelagic

7 species

Fast swimmers of the open column — tuna and mackerel taken by handline and pole-and-line.

ZONE 02 • SEA FLOOR • 40-400 M

Demersal

14 species

Bottom-dwellers from the Java and Arafura Seas — snapper, grouper, pomfret and the table fish Indonesia is known for.

ZONE 03 • REEF & SHELF

Cephalopods

4 species

Squid, cuttlefish and octopus from the Java Sea and Makassar Strait — cleaned, graded by piece count and frozen IQF.

From dock to deep freeze, under one roof

01 • RECEIVING & GRADING

02 • FILLETING & TRIMMING

03 • PROCESSING LINE

04 • PORTIONING & TRAY-UP

05 • COLD STORAGE • -25 °C

06 • STAGING & DISPATCH

Sustaining the sea is the first half of our name's promise

Selective gear only

Handline, pole-and-line and small coastal nets. No trawled tuna, no fish aggregating devices on our pelagic lines — one hook, one fish.

Traceable to the boat

Every carton carries a landing date, fishing ground and vessel record — from FMA 572, 573, 712 and 718 waters to your receiving dock.

Size-graded, never juvenile

We buy at or above maturity size for every species and return undersized catch decisions to the fishers — paying fairly for what we do take.

INDEX • 25 SPECIES ACROSS THREE FAMILIES

Product Catalog

PELAGIC — 7

DEMERSAL — 14

CEPHALOPODS — 4

Every species ships blast-frozen to -40°C core or IQF, stored at -25°C , packed to your specification.
Full export spec sheets — forms, packing, seasonality — available on request.
